

Abstract of the Disclosure:

A system and method for tracking and displaying a user's progress in a distance learning program such that the user and a teacher can independently observe the user's progress through the program. A tracker software program tracks the user's progress through the program, creates a history file of the user's progress, stores the history file on a remote server for independent access by the user and a teacher, and displays the user's progress to the user and/or teacher via a site map.
